Incidental breakage can be on universal waste as broken lamps. However if there are HID's in with them it is a debris because some HID's have small ampules of elemental mercury in them

> Thanks Shannon! Also, they are using a 55 gallon drum for incidental breakage, but they have not separated out the types of bulbs. I know we have discussed incidental breakage of bulbs and didn't know if they had to be segregated like the unbroken bulbs. Am I still correct in thinking that incidental breakage is still universal waste even if they generate a partial 55 gallon drum within the year?
>
> Sorry, I swear the longer time in-between working these issues and getting older…I can't remember squat!! I like to think I just have too much information stored in my brain and information leaks out to make more room…lol!

They can go directly, the inner liner is extra security measures.

Thanks
